

teaching

I am currently teaching these classes at USC:

- **Interactive Entertainment, Science, and Healthcare (CTIN 503)**
- **Transdisciplinary Media Design Practicum: Public Health, Neuroscience, and Medicine (IML 543)** (also known as [Compassionate Technologies](#) and taught in Crete, Greece in collaboration with the University of Crete)
- **490/590 directed research**
- **MFA thesis or MA integrative project supervision**

I designed the curriculum and direct the emphasis in Games and Health for the MFA in Interactive Media and the MA in Cinematic Arts with emphasis in Media Arts, Games and Health. The MA can also be done as a progressive degree at USC (Bachelor and Masters in 5 years).

For information about these degrees, visit <http://games.usc.edu/main/degree-programs/>.

If you are a prospective student (even in high school) and want to chat, email me gotsis [at] usc.edu.
